2015-12 -
2016-08

UI Developer

PCS Infinity, Noida, Uttar Pradesh

Worked with Client-site [Iffco Kisan Sanchar Limited], on various in-house projects, like Iffco Bazar mobile app, Iffco Kisan Urban Greens mobile app, IKSL main corporate website...etc. Role is to develop the user interface for these projects and maintaining them.

2014-08 -
2015-12

UI Developer

Logicore IT Services, Gurgaon, Haryana

Worked on various types of projects from E-commerce to CRMs here and nurtured all of my skills over here and made them my assets.

Projects

- **Deloitte - Fidelity International (AWS): -**
 - **CnT** – This project was about migrating the dealing features from one record keeping platform to another. The role was majorly developing features in ReactJS/Redux and test them using RTL. Used Webpack's module federation plugin to create every feature as a MFE so that they can be used in different platforms.
 - **GLI** – This project was about creating a new financial product named as Guaranteed Lifetime Income. The role

features (again as MFEs) in ReactJS/Redux and test them using RTL. Created respective node apps to provide the required data to these MFEs.

- **RRT** – Currently involved in RRT space (engineering team), provide with the opportunity to pick up the engineering items like creating a single click Jenkins pipeline to production, fixing SCA issues, implementing DAST etc. Also playing the role of a lead here to resolve any issues team members are facing.
- **Cisco WebEx:** - This is the leading enterprise solution for video conferencing, online meetings, screen share, and webinars. My role in this project was related to few specific products under WebEx ecosystem. I started off with working on a 'Angular' project that was an admin portal known as Control Hub which is designed to fulfill all admin related functionalities of any WebEx User/Organization. Worked on this for around 4 months. Then, I started working on WebEx subscription products (Free as well as Paid). This project is based on 'ReactJS/Redux' as Frontend technologies. To communicate with data, these projects communicated with a 'NodeJS' Backend project. All these projects were using 'TDD' approach to ensure quality. In all these projects, my part was to directly communicate with client to understand to upcoming features' requirements and deliver those in shortest time possible with quality.
- **IDFC MF Investor Portal/Corporate Website :** - Currently, I am working on this project which is a financial enterprise level product which deals in providing all the KYC verified Investors to have a platform where they can manage all of their Mutual fund Investments. My part is to build the frontend part using technologies viz. ReactJS, Redux, HTML, CSS, JavaScript

- **HDFC MF Distributor Portal :-** It's a financial enterprise level product which deals in providing all the certified Distributors to have a platform where they can manage all of their Investors as well as their Mutual fund Investments. My part was at first to create the User Interface of whole application till the time it got live. Now, I am handling the frontend (AngularJs) as well as the UI part of the application.
- **HDFC MF Investor Portal :-** It's a financial enterprise level product which deals in providing all the KYC verified Investors to have a platform where they can manage all of their Mutual fund Investments. My part was at first to create the User Interface of whole application till the time it got live. Now, I am handling the frontend (AngularJs) as well as the UI part of the application.
- **IFFCO Bazar :-**
IFFCO Bazar mobile app is the buyer/ seller meeting platform, where buyer and seller can list down/ post free ad with their expectation to trade products or services. IFFCO Bazar mobile app can work as a great tool for rural India where seller can sell there produce faster with increase his profits and at other hand a prospect buyer can search and purchase anything he require.
- **IFFCO Kisan Urban Greens :-** IFFCO Kisan Urban Greens is a customized informational app for all gardening enthusiasts. It has been designed keeping in mind, the lifestyle of today's metropolitan residents. The app has been created to guide people who are interested in gardening, by offering them recommendations for growing flowers & vegetables based on the soil condition, temperature, location, water requirement, sowing & blooming calendar etc., with an option to speak to subject matter experts, in case any additional information is required.
